PREFACE

This guide had been developed over the years to answer most general questions that arise regarding the process of obtaining building or plumbing permits. If this guide does not fully answer your questions, or if you have more specific questions, please feel free to call the Division of Building Codes Enforcement at (502) 722-8110 or Division of Plumbing at (502) 573-0397.

FIRST STEP: When planning a new construction project for City of Simpsonville please contact Triple S Planning & Zoning authority to ensure the proposed construction site is properly zoned. In many cases, substantial delays can be experienced if rezoning or zoning appeals are necessary. The City of Simpsonville, has no authority over Triple S Planning & Zoning commissions.

SECOND STEP: Determine if the state or local building department has building code enforcement responsibility. Kentucky is unique in that code enforcement responsibilities are divided between state and local jurisdictions with virtually no duplication of code enforcement activities.

Basically, local building code programs review the smaller construction projects and the state reviews the larger ones. Section 104.0 of the 2013 KBC identifies building code enforcement responsibilities. Please refer to Page 17 of this Guide to determine who will review your project. Local jurisdictions may petition the DHBC for additional responsibilities beyond the minimum assigned by law. A listing of those local jurisdictions currently having additional responsibilities can be found on our web-site, www.dhbc.ky.gov or obtained by phoning our office at 502-573-0373.

There are still several city and county governments that do not have building code enforcement programs. In these areas, the DHBC is responsible for all buildings other than single family dwellings. Page 17 of this Guide describes the types of projects to be reviewed locally or by the DHBC. If you are unaware of a local code enforcement program, call this office to confirm.

After determining whether the DHBC or the local code official has jurisdiction, the **third/ final step** is to make initial contact with the appropriate code enforcement agency to determine the process for obtaining a building construction permit. Each local agency determines its own permit process and they may vary across the state.

This detailed Plan Submission Application Guide to answer most general questions regarding who, what, when, where and how of obtaining a building construction permit for those projects under the City of Simpsonville's jurisdiction. More specific questions can be directed to the Building Official for the Division of Building Codes Enforcement.

SECTION 121.0 PLAN REVIEW AND INSPECTION FEES**

121.1 General. A permit to begin work for new construction, alteration, removal or other building operations shall not be issued until the fees prescribed by law shall have been paid to the Department, if applicable, and to the local building department. 121.2 Special fees. Payment of fees for construction, alteration or removal, and for all work done in connection with or concurrently with the work contemplated by a building permit shall not relieve the applicant or holder of the permit from the payment of other fees that may be prescribed by law or ordinance for water taps, sewer connections, electrical permits, erection of signs and display structures, marquees or other appurtenant structures, or fees of inspections or certificates of occupancy or other privileges or requirements established by law.

The fee for buildings with multiple or mixed occupancies may be calculated by using the cost per square foot multiplier of the predominant use.

121.3.5 Additions to existing buildings. Plan review fees for additions to existing buildings, which shall not require the entire building to conform to the Kentucky Building Code, shall be calculated in accordance with Table 121.3.1 by the measurements of the square footage of the addition, as determined by the outside dimensions of the

addition. Minimum fee for the review of plans under this section shall be \$100.

121.3.7 Change in use. Plan review fees for existing buildings in which the use group or occupancy type is changed shall be calculated in accordance with Table 121.3.1 by using the total square footage of the entire building or structure under the new occupancy type as determined by the outside dimensions. Minimum fee for review of plans under this section shall be \$100.

121.3.8 Alterations and repairs.
